RAHUL RAJ

Java Full Stack Developer | 5.8+ Years of Experience | Serving Notice Period

rajdeveloper017@gmail.com | +91 85410 77579 | rahulrajonline.in

CAREER OBJECTIVE

Results-driven Java Full Stack Developer with 5.8+ years of experience designing, building, and modernizing enterprise-grade REST APIs and microservices for Fortune 500 clients across banking, insurance, and healthcare domains. Skilled in Spring Boot, Quarkus, Angular, and event-driven architectures using Apache Kafka, with a strong record of translating client requirements into scalable, secure, and maintainable solutions. Adept at leveraging AI-augmented engineering tools (Claude AI, GitHub Copilot, Devin AI) to accelerate development velocity and code quality. Seeking to bring deep backend expertise and full-stack versatility to a challenging engineering role.

SKILLS

Languages & Frameworks	Java 8 / 17 / 21, Spring Boot, Quarkus, JPA / Hibernate, Angular, TypeScript, HTML5, CSS3
Architecture & Messaging	Microservices, Hexagonal Architecture, RESTful APIs, Event-Driven Design, Apache Kafka
API Security & Tooling	JWT Authentication, Swagger / OpenAPI
Databases & Caching	MS SQL Server, PostgreSQL, AWS RDS, Redis
DevOps & Testing	CI/CD, JUnit, Mockito
AI Tools	Claude AI, GitHub Copilot, Devin AI

PROFESSIONAL EXPERIENCE

Infosys — Jan 2025 – Present

Senior Associate Consultant

Project: Fiserv Inc., USA — Mar 2025 – Present

- Collaborated directly with client stakeholders to translate evolving requirements into technical solutions.
- Built and modernized REST APIs using Spring Boot / Quarkus; contributed Angular components consuming them.
- Implemented Apigee API Gateway for routing, security, and traffic management.
- Modernized legacy APIs to align with new business needs.

Tata Consultancy Services — Jan 2021 – Jan 2025

System Engineer

Project: State Farm, USA — May 2024 – Jan 2025

- Took ownership of existing APIs, improving performance and reliability.
- Secured APIs with JWT and documented them in Swagger/OpenAPI.
- Interacted with clients to gather and implement requirements across backend and frontend.

Project: Cardinal Health Inc., USA — Jan 2021 – May 2024

- Designed and developed Spring Boot microservices and REST APIs end-to-end.
- Focused on backend architecture, business logic, and persistence with JPA/Hibernate and MS SQL Server.
- Collaborated with QA and analysts to deliver healthcare supply-chain solutions.

EDUCATION

Bachelor of Computer Applications (BCA) — 2017 – 2020

Kolhan University — Aggregate: 80.97%
